Built around the work.

A High Ground Conversions Type II ambulance on the Ford Transit platform. Review the features below with us as you plan your specification.

Safety & construction

- Electric oxygen shutoff and digital oxygen monitoring
- Whelen exterior lighting
- Medical-grade Kydex surfaces for walls, cabinets and ceiling
- Safety-yellow grab rails
- Strong floor structure and reinforced steel-tube side structure
- Fully welded cabinet subframe
- Reduced seams to limit separation, squeaks and fluid penetration
- Single-click, four-point harnesses for attendant and bench
- Secured fire extinguisher in the cab center console

Designed and built by
High Ground Conversions

Comfort & usability

- Custom SDG HVAC system; front and rear climate controls
- Front and rear HED displays with intuitive touch screens
- Aluminum bulkhead to maximize attendant space and recline
- Hammer-tone ALS aluminum bench seat
- Recessed cot-wheel pass to preserve aisle space
- Patient-compartment insulation for comfort and a quieter ride

Efficiency & service

- Kussmaul Super Auto Eject
- High idle included on this Type II
- Torsion-hinge bench seats with concealed retractors
- Electrical service disconnect for the patient compartment
- Accessible air-conditioning compartment
- Manufacturer states KKK-A-1822F / CAAS GVS compliance and SAE AMD testing
